Asia-Pacific On your mark, get set, grow!

Making every day a better day

Asia-Pacific is on the rise and so are its expectations!

Asia-Pacific companies are rapidly evolving into major world players, competing with long-standing international organizations in their quest for growth. As a result, their expectations are rising. They want more efficient supply chains, higher safety standards, the latest best practices and service operators capable of managing complex fiscal, administrative and foreign-exchange environments. Their own employees expect more Quality of Life services and local governments demand more-responsible activities.

In a nutshell, everyone expects more! That's where Sodexo comes in, to help you match and even surpass these expectations.

THE STRENGTH. THE EXPERIENCE AND THE WILL

Few companies can compete with Sodexo's regional coverage, let alone with the quality and experience of our people. With 15 years of regional expertise, a robust network and a majority of ISO-certified countries, we're vested for the long term. So wherever our clients need to go, they can count on us to go with them. This is particularly valuable for clients operating barges, offshore drilling rigs or multiple sites and who expect the same level of service at each one.

RELIABLE. HIGH-PERFORMANCE SUPPLY CHAINS

Asia-Pacific is competitive! So being able to guarantee an effective regional supply chain is vital. With strategically situated hubs in Singapore, Perth and Shanghai we're able to purchase from the best sources, at the best prices! In Shanghai, our sourcing center buys directly from the manufacturers and sends regular shipments to our operations throughout the region. In Singapore, our dedicated base supports offshore clients with their new builds, upgrades or rigs in transit. We cover the region's shipyards and logistic bases and help clients renovate or design new accommodation units, mobilize rigs, or organize tows to anywhere in the world.

DELIVERING NOTICEABLE VALUE ...

Attracting a quality workforce in such a high-growth, multi-cultural region is not easy, but retaining it can be even harder. Sodexo Symmetry, introduced in Australia in 2005, is a lifestyle-enhancement program specially designed to increase employee retention levels. By adopting our services, many of our clients have seen an increase in their employee retention levels, demonstrating once again the value we bring on site.

... FROM VILLAGE CONSTRUCTION TO DECOMMISSIONING

Our Total Remote Site Solutions offer is unique; it provides proven, best-in-class service, safety and fully integrated remote-site solutions tailored to onshore and offshore sites alike. It spans the entire lifecycle of your project, from the design, construction and site operation and production, to the decommissioning and site rehabilitation. And to keep things simple, we provide clients with a single point of contact.

A WIN-WIN SITUATION FOR ALL **Change**

We know the importance of providing tangible value to the host country and the communities surrounding each project. Our Community Content program Xchange endeavors to employ local workers and use local suppliers beyond company and government requirements. It establishes durable long-term partnerships with local companies and organizations, and it benefits local communities even after you move on. In Australia, our proprietary "Resource Recovery Program" aims to achieve a zeroenvironmental-footprint result for our services on camp. Our proactive approach yields a win-win situation for everyone.

THOUSANDS OF MILES FROM NOWHERE

BP's Tangguh LNG project is about as remote as you can get. Located in Irian Jaya, Indonesia, it's thousands of kilometers from Jakarta and hundreds of kilometers by ocean from the nearest logistics base. But despite its isolated location, Sodexo Remote Sites has been bringing valuably innovative services to them since 2002.

In an amazing 70 days from the initial contract date, Sodexo was able to commission, mobilize and operate a 150-man camp - ahead of schedule and on budget! Today, our broad range of services covers everything from catering and laundry to transportation and lifting equipment, and complies with benchmark HSE standards. What's more, we've been able to ensure that 40% of employees are local hires and 10% of supplies are purchased locally, helping BP demonstrate its solid commitment to the surrounding communities.
