Transforming the Workplace with Vital Spaces

A new worklife dynamic

Sodexo Switzerland is the only company in Switzerland to offer Corporate Catering and Integral Facility Services (IFM) from a single source.

We also create smart work environments that help our clients become even more attractive on the labour market. After all, the world has changed.

Companies will be successful in the future if they create physically and virtually connected experiences that enable employees to thrive in a hybrid

working environment. The workplace now exists inside and outside the four traditional walls of the office and needs to be more flexible, dynamic and scalable. As a result, the spaces in which we work have never been more important. **Now it is time to think strategically about these workspaces and be ready to support your employees no matter what the future holds.** As your workplace transformation partner, we can make this happen – **with Vital Spaces.**

Vital Spaces - connected, flexible and value-based

With the **Vital Spaces 360° degree solution approach**, we expand traditional corporate food services, as well as soft and hard FM services into an integrated facility management service world.

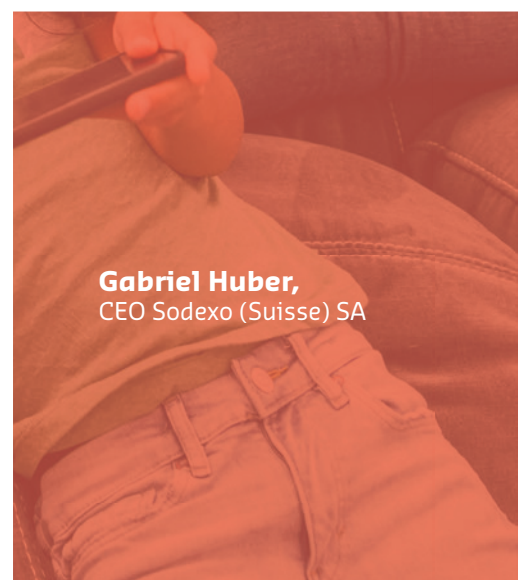

The **holistic view** of the working environment

Together we optimise spaces with services and solutions that create experiences for employees. Thus, we enable them to be productive wherever they work. Vitality in your organisation is central to sustainable expansion and growth. With Vital Spaces, we sustainably enhance employee wellbeing, integrating health and safety into everything we do. We also strive to improve the quality of life of our employees and the people we serve by promoting economic, social and environmental development.

Let us join you on transforming your employee journey using a methodical approach. By analysing all physical and virtual employee touchpoints, we improve the work experience of everyone. **Our services are designed to focus on sustainable solutions, optimising costs and addressing the specific needs of your company and your employees.** That's because our experts work with a selected network of partners that fit your organisation's unique needs.

Our concern is not only to enable hybrid working, but also to make it attractive. We currently show our customers how they can use the workplace better and more sensibly in accordance with the new demands. And we explain to them that it is not enough to start with the restaurant alone. Rather, a holistic approach is needed.

Gabriel Huber,
CEO Sodexo (Suisse) SA
