A good day in health care video

Speaking in English, "Morning"

Speaking in Italian, "Thank you"

Speaking in English, "These menus are really patient focused"

Speaking in French, "The project is finished"

Speaking in Spanish "See you later"

For me, a good day

is knowing that I am a part of something
that saves lives.

It's a good day

when I help the patient
feel more better.

When I think about
the doctors and nurses
working very long hours.

They rely on us
and we make it happen

It's a good day
when I see all our food is eaten.

We know it helps
make patients get better.

That's why we are here.

Speaking in English, "The patient is in great hands. No need to worry, ok?"

Taking the time to talk

To a patient or a family

When they're having a bad day

And knowing

Yeah

I made them feel a little better.

That's a really great day.

Coming up with a new idea

That makes a difference.

When you save money
That can be spent on better things.
That's a really good day.
When the client says,
"Thank you, good job."
That's special.
That's always a really good day.
Knowing you're part of a team
Who look out for one another.
Working together
When we need to get it done.
It's knowing
It's about one thing
Making doctors, nurses,
And patients' lives better.
It's pretty cool to think
That we've got almost 100,000 people
Around the world
Doing what we do
Every day.
Speaking in French, "no worries"
Putting on this uniform.
It really ups my game.
I know I'm working towards
Something bigger.
Speaking in French, "for the team, please"
I work in healthcare
Because I want to help people.
Knowing that today, I made the difference.
That's a really good day.
That's why we do what we do.
That's why we are here.
To always make it a great day.
Speaking in English, "have a good day"
