Change excluding currency effect calculated converting H1 2017 figures at FY 2016 rates, except for countries with hyperinflationary economies. As a result for Venezuelan Bolivar, H1 2017 and H1 2016 figures in VEF have been converted at the exchange rate of USD 1 = VEF 700 vs. VEF 645 for FY 2016.

Issue volume
Issue volume corresponds to the total face value of service vouchers, cards and digitally-delivered services issued by the Group (Benefits and Rewards Services activity) for beneficiaries on behalf of clients.

For H1 2016 it concerns exceptional expenses of €37m (or €24m net of taxes) related to the Adaptation and Simplification program.

Operating margin at constant rate
Margin calculated converting H1 2017 figures at FY 2016 rates, except for countries with hyperinflationary economies. As a result for Venezuelan Bolivar, H1 2017 and H1 2016 figures in VEF have been converted at the exchange rate of USD 1 = VEF 700 vs. VEF 645 for FY 2016.

Operating profit before exceptional expenses

Organic growth
Organic growth corresponds to the increase in revenue for a given period (the "current period") compared to the revenue reported for the same period of the prior fiscal year, calculated using the exchange rate for the prior fiscal year; and excluding the impact of business acquisitions and divestments, as follows:

- for businesses acquired during the current period, revenue generated since the acquisition date is excluded from the organic growth calculation;
- for businesses acquired during the prior fiscal year, revenue generated during the current period up until the first anniversary date of the acquisition is excluded;
- for businesses divested during the prior fiscal year, revenue generated in the comparative period of the prior fiscal year until the divestment date is excluded;
- for businesses divested during the current fiscal year, revenue generated in the period commencing 12 months before the divestment date up to the end of the comparative period of the prior fiscal year is excluded.

For countries with hyperinflationary economies all figures are converted at the latest closing rate for both periods. As a result, for the calculation of organic growth, Benefits & Rewards figures for H1 2017 and H1 2016 in Venezuelan Bolivar, have been converted at the exchange rate of USD 1 = VEF 700 vs. VEF 645 for FY 2016.
